FIELD OF PLAY

SYNOPSIS OF PLAY.

On referring to the diagram, it will be seen that from end to end of the field each of the representatives has a particular opponent to play against. On the one hand the goal defenders, viz., Queensland 1, 2, 3, 4, 5, 6, have to prevent the opposing attack players, N.S.W. 8, 9, 10, 11, 12, from scoring goals, and vice versa at the other end of the field.

The allotted positions are not fixed, but may be changed as desired according to the success or otherwise of the individual against his opponent.

The play is commenced in the centre of the field, the "centre" player (7) being the connecting link between his side's defending players and the attacking players, giving help as occasion demands to both defence and attack divisions. The players are allowed to go wherever they please; experience has taught them how and when to change their positions to the best advantage.

It will thus be seen that the game is simply a struggle by a combination of attack players to get past a combination of defending players, and so by sprinting, dodging, quick passing, feinting, and manoeuvring for positions, a breach is made in the ranks of the defenders and a shot at goal results. Each goal counts one.
